Java String Concatenation

‹ Previous   **Next ›**

String Concatenation

The **+** operator can be used between strings to combine them. This is called **concatenation**:

Example

Get your own Java Server

```
String firstName = "John";
String lastName = "Doe";
System.out.println(firstName + " " + lastName);
```

Note that we have added an empty text (" ") to create a space between firstName and lastName on print.

You can also use the `concat()` method to concatenate two strings:

Example

```java
String firstName = "John ";
String lastName = "Doe";
System.out.println(firstName.concat(lastName));
```

Try it Yourself »

Exercise ?

Which operator can be used to combine strings?

◯   +
